

Project Summary

Kaggle Data Science Survey Analysis | Microsoft Excel:

- Analyzed the Kaggle Data Science Survey across three years (2018–2020), working with a large dataset of over 62,000 rows and approximately 300 columns.
- The project involved data cleaning and preparation, data transformation and automation using Power Query, and data modeling and relationship management through Power Pivot.
- Pivot Tables and Pivot Charts were used to summarize and explore the data, followed by the development of interactive dashboards to communicate key insights and support data storytelling.
- Tools & Skills: Microsoft Excel, Power Query, Power Pivot, Pivot Tables, Pivot Charts, Data Cleaning, Data Modeling, Dashboard Design, Data Storytelling.
